

● Unselected states/views    ● Selected clean anchor    ● Perturbed view    — 90% t-SNE covariance envelope

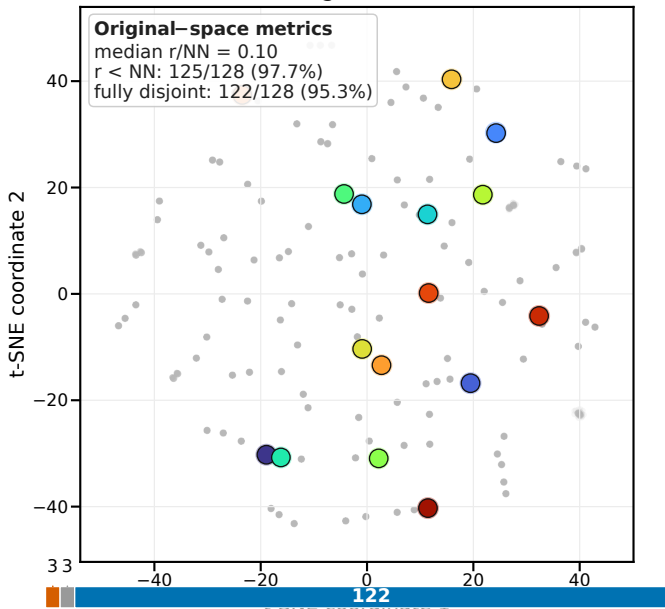

(a) No augmentation · Encoder

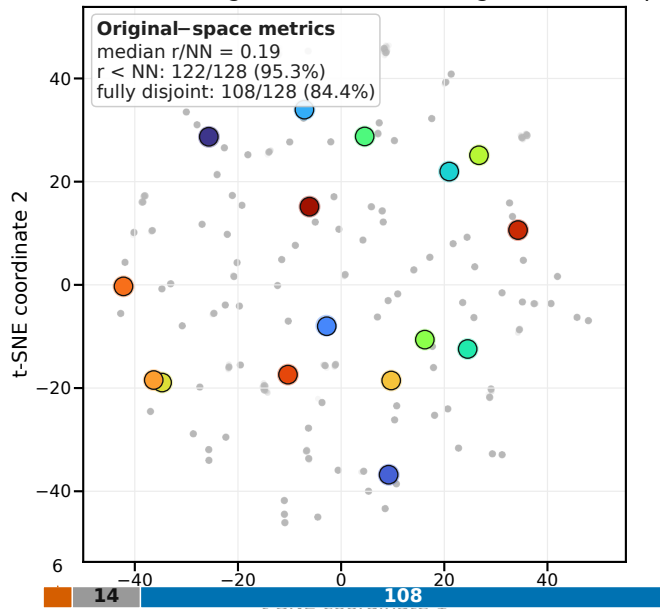

(b) No augmentation · After eight rollout steps

(c) Gaussian augmentation · Encoder

(d) Gaussian augmentation · After eight rollout steps

Original-space anchor categories (counts shown in each strip)

Reaches/exceeds spacing    Within spacing, not disjoint    Fully disjoint

NN denotes the nearest other clean anchor in the original high-dimensional representation.
