

(a) Inputs

● clean h_i

■ perturbed $\tilde{h}_i^{(m)}$

Encoder

▲ different state

● other states

(b) Encoder and rollout representations

● clean ■ perturbed ▲ different state ● other states
encoder space H -step rollout space

(c) ACPC diagnostics

Invariance Radius (IR): visual sensitivity

Distinction Rate (DR): state separation

IR ↓

DR ↑

FRAGILE

IR HIGH

DR LOW

FAIL

wide radius weak separation

ROBUST

IR LOW

DR HIGH

PASS

tight radius clear separation
